Product Description

Easy Trimming Right from your Tractor!

Harness the power of your tractor for trimming and mowing along roadsides, fence lines, walls, and other long distances. The DR PRO XLP 3-Point Hitch Trimmer Mower allows you to trim effortlessly while you ride in comfort.

Trimming long fence lines or mowing roadside ditches can mean a lot of time on your feet with a handheld or walk-behind string trimmer. For properties with exceptionally long fences to keep tidy and roadsides to maintain, the DR 3-Point Hitch Trimmer Mower is the easiest solution! Ride in comfort while the tractor-mounted Trimmer Mower whips your property into shape.

Trim weeds and high grass within a whisker of fence posts, walls, and other obstacles as you simply operate your tractor. The spring-loaded mowing arm automatically deflects around obstacles, so there's no worrying about leaving spots untrimmed or damaging your posts. The 23" diameter steel guard allows you to safely trim within a half-inch of any obstacle. You can even adjust the amount of resistance they place against obstacles.

The pivoting deck is ideal for roadsides, pond banks, and any other areas with uneven ground. It allows the trimmer head to follow the contours of the turf, leaving it trimmed and tidy. And the adjustable-height anti-scalping wheel prevents damage to the ground. Cutting height adjustment gives you precise control over the height of the remaining grass. And don't worry about tough weeds — the DR 3-Point Hitch Trimmer Mower accepts all DR Trimmer cord, including our extra-thick 225- and 255 mil cords for slicing through tough weeds and grass.

In order to ensure proper cutting and discharge of material, it is recommended that you not exceed 2 mph while trimming with the DR 3-Point Hitch Trimmer Mower.

Note: When purchasing replacement cord for this model, be sure to choose either the Quick-Lock 13" Pre-Cut Cord or a bulk cord roll.

Warranty Coverage

- Machine: 2 years residential; 90 days commercial

Features

Spring-Loaded Mowing Arm The spring-loaded mowing arm allows the trimmer head to automatically deflect around fence posts, mailboxes, walls, and other obstacles. This allows you to trim right up close to just about anything on your property!

Steel Guard The 23" diameter steel guard ensures that you'll trim just as close to fence posts as you need to, but not damage them. The guard allows the trimmer head to cut within a half-inch of any obstacle.

Adjustable Height Anti-Scalping Wheel The adjustable-height anti-scalping wheel prevents damage to the turf by keeping the trimmer head always at a constant distance from the ground. Adjust the height to make precise cutting height changes. Cutting height can be adjusted between 1.5" and 3.5".

Quick-Lock™ Trimmer Head Quick-Lock Trimmer Head makes replacing the cord on your Trimmer Mower faster and easier than ever! It takes just seconds — without tools — to insert new cord into the trimmer head. The patented gripping system anchors the cord instantly, holding tight and never letting go. Accepts our 225 mil and 255 mil cords—the thickest, longest-lasting in the industry!

Pivoting Deck Follow the contours of the land with the unique pivoting deck. Ideal for anywhere with uneven ground, the pivoting deck ensures professional-quality results — an even trim with no scalping!

Protected Shaft Coupling The protected shaft coupling keeps your PTO shaft safe from debris and damage.

Super-duty Cutting Cords The PRO XL Trimmer Mower accepts all DR trimming cord, including our super-thick 225 mil and 255 mil cutting cords—designed exclusively for the Quick-Lock Trimmer Head.
