

Dr Power PREMIER Leaf and Lawn Vacuum

Our most basic walk-behind model, the PREMIER has the power and capacity to vacuum your lawn free of leaves, grass clippings, twigs, nuts and other yard lawn debris. Perfect for smaller properties and/or landscaped areas where you can't take a larger machine. Easy to start, easy to use, and built to last!

Product Description

Perfect for Smaller Properties or Landscaped Areas

If you don't own a lawn tractor (required for our tow-behind models)—or if you need a vac for cleaning up landscaped areas where you can't take your lawn tractor—consider our PREMIER walk-behind model. Powered by an easy starting 6.6 HP DR OHV engine, the PREMIER will gather up to 60 lbs. (6 cu. ft.) of leaves and other yard debris.

The steel impeller reduces materials by up to 10:1 making it ready for curbside pickup or the compost pile. The collection bag can be detached (no tools required) for carrying to a remote dumping spot, or it can be emptied while on the machine through the easy-access zipper openings.

Optional Vacuum Hose for Hard to Reach Areas

Add our optional vacuum hose for seven feet of extra reach into areas where you can't roll the PREMIER—in garden beds, along foundations, in window wells, etc.

Product Summary

- 6.6 HP (223cc) DR OHV Engine with recoil start
- Capacity: 6 cu. ft. (60 lbs)
- Reduces collected materials 10:1
- Intake height: 1" to 5"
- Side zipper openings for easy emptying
- Tires: Turf Tread, 10" x 4" (front), 8" x 3" (rear)
- All-steel impeller with a Lifetime Warranty
- Weight: 200 lbs

Warranty Coverage

- Machine: 2 years residential, 90 days commercial
- Engine: 2 years residential, 1 year commercial

Features

POWERFUL VACUUM FORCE Unparalleled among residential walk-behind vacs. All the power you need to collect wet, matted leaves, pinecones, nuts, and other debris.

ALL STEEL IMPELLER is so durable it comes with a **LIFETIME WARRANTY**. Serrated fins aggressively mulch and reduce collected material 10:1!

POWERFUL DR ENGINE High-quality 6.6 HP DR OHV engine (223cc) produces 9.59 ft-lbs gross torque (at 2500 rpm per SAE J1940).

EXTRA LARGE COLLECTION BAG Handles up to 6 cubic feet of debris, allowing for less frequent dumping than competitive models. Uses easily accessible side zipper bags for fast and effortless emptying. Bag is quickly detachable (without use of tools or hook and loop fasteners) for discharging contents away from the machine.

POWER ASSISTED DISCHARGE By opening one or both of the side flaps, then starting up the engine, the impeller will provide a blast of air that will blow contents out of the bag quickly and efficiently.

ADJUSTABLE INTAKE HEIGHT From the operator's position the collection snout can easily be adjusted from 1" off the ground (for maximum vacuum power) to a maximum of 5" (for less suction, or to create clearance for uneven terrain).

PNEUMATIC TIRES For easy rolling, even on challenging terrain. Front wheels are 10 x 4", rear wheels are 8" x 3". Rear wheels swivel for responsive steering.
